Gross capital formation in infrastructure constitutes about 4.55% of GDP at present. In order to sustain an annual growth rate of 8.9% in GDP, investments in infrastructure must rise to at least 8% of GDP by the end of Eleventh Five Year Plan.

Given the constraints on public resources and the competing pressures from social sectors and rural infrastructure, it is inevitable that reliance must shift to Public Private Partnerships (PPPs) for funding large infrastructure projects that must be sustained by user charges.

It is necessary to create an enabling environment for attracting private capital in PPPs that would improve the quality of services and reduce costs. A credible selection process, as outlined in these guidelines, constitutes an important segment of the policy and regulatory framework.

“I believe that in future, PPP projects should be awarded on the basis of transparent competitive bidding with a standard concession agreement to the extent possible”

- Dr. Manmohan Singh
Prime Minister of India

“Attracting private capital through the PPP or any other route is neither easy nor automatic. A key pre-requisite is to lay down a policy framework that assures a fair return for investors provided they attain reasonable levels of efficiency. But the policy must also protect the interests of users, especially the poor. PPPs are useful only if they assure quality supply at reasonable cost.”

- Dr. Manmohan Singh
Prime Minister of India

“Investors will come in not because there is a well-designed policy but because there is an assurance that there will be transparency. From bidding to tax concessions at every stage there must be complete transparency. Projects which have succeeded are projects which have exhibited a remarkable degree of transparency, consultation, involvement and periodic monitoring. Projects which have failed are projects which are designed in secret and implemented without consultation.”

- Shri P. Chidambaram
Minister of Finance

“It is natural to look to evolve a suitable strategy for financing infrastructure development in which scarce government funds can be leveraged by bringing in resources from the private sector. This is not easy. It requires the evolution of credible policy framework which is seen to be fair to both consumer and investor interests and which receives broad public support.”

- Shri Montek Singh Ahluwalia
Deputy Chairman, Planning Commission

For ensuring competitive, efficient and economic delivery of infrastructure projects and services through Public Private Partnerships (PPPs), selection of bidders should be undertaken in a manner that is fair, transparent and inexpensive.

The selection process consists of two stages. The first stage is referred to as Request for Qualification (RFQ) and aims at pre-qualification and short-listing of applicants. The second stage relates to Request for Proposals (RFP) involving submission of financial offers by short-listed applicants. The guidelines in this volume primarily address the RFQ stage and provide a Model RFQ document.

It is expected that the administrative ministries, departments and autonomous bodies intending to procure PPP projects would observe these guidelines

Preface

The justification for promoting Public Private Partnership (PPP) in infrastructure lies in its potential to improve the quality of service with lower costs, besides attracting private capital to fund public projects. This, however, is predicated on a policy and regulatory framework that provides a fair, transparent and competitive environment. Flaws in the framework can lead to unintended outcomes; a cautious and diligent approach is, therefore, necessary while formulating the rules of engagement.

One of the key factors that determines the success of a PPP project is the criteria for selection of the project sponsor, especially as such projects typically involve large capital investments for providing essential infrastructure services to users on a long-term basis. A bidder lacking in sufficient technical and financial capacity can well jeopardise the project and compromise the services that the government is committed to provide. On the other hand, selection based on negotiations or inadequate competition can deprive the public exchequer and users of the assurance that they are paying a competitive price.

There was divergence in the principles and practices followed for selection of bidders for PPP projects in different sectors. A variety of technical, financial and other criteria were being used by the project authorities, and in some cases, technical proposals/bids were also invited along with financial offers. Some of the qualification parameters appeared subjective and were, therefore, prone to disputes and controversy. In several cases, the costs of making applications accompanied by detailed technical proposals were significant, and dampened bidder participation. There were instances where inadequacies in the process attracted judicial review coupled with the attendant delays in project implementation. A comprehensive review of the ongoing practices had, therefore, become necessary.

With a view to deliberating on the guidelines to be laid

down for pre-qualification and short-listing of applicants who should be invited to make financial offers, the Committee on Infrastructure (CoI) chaired by the Prime Minister constituted an inter-ministerial group under the chairmanship of Secretary, Department of Expenditure. Following extensive consultations with stakeholders and experts, the Group submitted its recommendations that were considered and accepted by CoI. The Guidelines have since been issued by the Ministry of Finance and are contained in this volume.

The Guidelines include a Model RFQ (Request for Qualification) document that Ministries and autonomous bodies of the Central Government are expected to follow. This Model would also serve as a best practice document that State Governments may wish to adopt. It is hoped that adoption of these Guidelines would enhance the possibilities of a fair, transparent and competitive selection of bidders for delivery of successful PPP projects in infrastructure.

Overview of the framework

For ensuring competitive, efficient and economic delivery of services, selection of bidders for the procurement of infrastructure projects through Public Private Partnership (PPP) should be undertaken in a manner that is fair, transparent and inexpensive. In line with this objective, guidelines have been framed for pre-qualification of bidders for PPP projects. The guidelines are broad and generic in nature and are aimed at providing predictability to the entire process, allowing decisions to be made objectively and expeditiously. They address the critical minimum requirements that must be observed in conducting the selection process.

Selection must be fair and transparent

It is expected that the administrative ministries/autonomous bodies intending to procure PPP projects would observe these guidelines for short listing of bidders for the Request for Proposal (RFP) stage involving submission of financial bids. The salient features of the guidelines are as follows.

Two Stage Process

The bidding process for PPP projects is typically divided into two stages. In the first stage, eligible and prospective bidders are shortlisted. This stage is generally referred to as Request for Qualification (RFQ) or Expression of Interest (EoI). The objective is to short-list eligible bidders for stage two of the process. In the second and final stage, which is generally referred to as the Request for Proposal (RFP) or invitation of financial bids, the bidders engage in a comprehensive scrutiny of the project before submitting their financial offers.

Selection should be in two stages

Request for Qualification (RFQ)

The RFQ process should aim at short-listing and pre-qualifying applicants who will be asked to submit financial bids in the RFP stage. The objective is to identify credible bidders

Only credible bidders should be pre-qualified

who have the requisite technical and financial capacity for undertaking the project. In order to encourage greater participation from credible domestic and international investors, the RFQ document should not require respondents to incur significant expense in preparing a response. The information sought for the purposes of pre-qualification should generally be restricted to technical and financial capabilities that are relevant to the project. Such information should be precise and quantified so that the process of short-listing is fair and transparent, and does not expose the government to disputes or controversies.

Number of bidders to be pre-qualified

Bidders should be short-listed for inviting financial bids

The number of bidders to be pre-qualified and short-listed for the final stage of bidding i.e. the RFP stage needs careful consideration. On the one hand, the number of pre-qualified bidders should be adequate for ensuring real competition in bidding. On the other hand, a large number of short-listed bidders is viewed as a factor that dampens participation by serious bidders, thus diluting competition, because credible investors are normally less inclined to spend the time and money necessary for making a competitive PPP bid if the zone of consideration is unduly large.

Unlike a bid for procurement of goods and services, bids for PPP projects involve greater risks, significantly larger investments and long-term participation. Since PPP projects in infrastructure provide a critical service to the users at large, the quality and reliability of service assumes greater importance. Moreover, restricting the list to the best available bidders improves the chances of a successful PPP operation. For these reasons, about five pre-qualified bidders are favoured as an international best practice for securing high quality financial bids. In case short-listing is to be done for two or three projects at the same time, the number of short-listed bidders could be increased to 7 and 10 respectively. For this purpose, a fair and transparent system of evaluation at the RFQ stage would be necessary.

Specifying stringent pre-qualification criteria

While stringent eligibility criteria would ensure pre-qualification of bidders well suited for the RFP stage, yet the same would effectively reduce the number of qualified bidders. A balance, therefore, needs to be drawn for serving the objective of pre-qualifying a reasonable number of bidders for the RFP stage. The principles for determining the eligibility criteria such as technical and financial capacity should be formulated keeping these considerations in view.

Criteria must identify suitable bidders

Evaluation Criteria

The criteria for short-listing of bidders should be divided into technical and financial parameters as stated below:

Technical Capacity

The applicant should have acquired sufficient experience and capacity in building infrastructure projects. This can be measured either from the construction work undertaken/commissioned by him, or from revenues of BOT/BOLT/BOO projects, or from both, during the 5 years preceding the application date. Eligibility conditions, as necessary, may also be stipulated in respect of O&M experience.

Experience to be indicator of technical capacity

The technical capacity of a bidder can be assessed on the following parameters:

- (a) Project experience on BOT projects in the specified sector.
- (b) Project experience on BOT Projects in the core sector.
- (c) Construction experience in the specified sector.
- (d) Construction experience in the core sector.
- (e) O&M Experience: The consortium may include a member with at least twenty six percent equity participation and having relevant experience in operation

and maintenance (O&M). Alternatively, the successful bidder may be required to enter into an operations & maintenance (O&M) agreement with an entity having equivalent experience. While suggesting this arrangement, it is proposed to provide sufficient flexibility for modifying these requirements to suit the needs of individual sectors/projects.

Financial Capacity

Net worth to be indicator of financial capacity

Applicants should have a minimum net worth equivalent to 25% of the estimated capital cost of the project for which bids are to be invited. In the case of projects with an estimated cost of Rs. 1,000 (one thousand) crore or more, the requirement of net worth could be suitably reduced, but should be no less than 15%. This would ensure that pre-qualified applicants have sufficient financial strength to undertake the project.

Eligibility of Experience

Consortium members should have substantial stake

The members of the consortium, who claim experience and networth in the RFQ must hold at least 26% of the consortium's equity. This would ensure that members with small equity holdings are not included with the sole purpose of achieving pre-qualification. In other words, only the experience and networth of consortium members with a substantial stake is to be counted.

Technical evaluation to be part of pre-qualification stage

Technical evaluation to precede bid stage

Requiring a technical evaluation at the RFP stage would normally lead to an elaborate and costly evaluation of complex proposals which are, by their very nature, difficult to compare since technical proposals of different bidders would vary significantly. Apart from the difficulties in evaluating diverse proposals on a common set of parameters, such evaluation also implies that instead of the government determining the assets

and services to be provided by the selected bidder, it is the technical bid that would tend to guide the outcome. Logically, the government should set the technical parameters and ask for financial bids only, leaving sufficient flexibility for bidders to design and engineer the project in a manner that conforms to pre-determined standards and specifications, including service outputs.

In case of exceptionally complex projects where the project authority determines that the bidders must submit their technical proposals/plans, the requirements thereof should be specified in detail and such proposals/plans should be invited at the qualification stage, either along with the initial applications or at an intermediate stage preceding the bid stage. Only pre-qualified applicants should be invited to participate in the bid stage, which should only consist of an invitation to submit financial offers.

Restrict bid stage to financial bids

Conclusion

A Model RFQ document has been developed based on the principles outlined above. The model document is generic in nature and aims at lending transparency and predictability to the entire process, allowing decisions to be made expeditiously. It also provides the requisite sector-specific and project-specific flexibility by placing several provisions within square brackets, thus enabling project authorities to make necessary substitutions. To the extent possible, the concerned ministries should standardise the provisions contained in square brackets so that case by case modifications are minimised. Some flexibility has also been afforded through explanations in the footnotes. In case any further flexibility is needed for a specific project, the required modifications may be made with the approval of the PPP Appraisal Committee.

Model RFQ document should be followed

The Model RFQ document addresses the critical requirements that should be observed for conducting a fair and transparent process of pre-qualification. It is expected that the

administrative ministries and autonomous bodies of the Central Government intending to procure infrastructure projects through PPP would observe these Guidelines and adopt the Model RFQ document for short-listing of applicants for the Request for Proposal (RFP)/financial bid stage. The Model RFQ document is also commended for use by the State Governments.

OFFICE MEMORANDUM

Subject : Guidelines for Pre-Qualification of Bidders for PPP Projects

- 1.1 I am directed to state that for pre-qualification and short-listing of bidders eligible for submission of financial bids for projects to be implemented through Public Private Partnership (PPP), the following guidelines may be followed henceforth:*
- 1.2 These guidelines shall apply to all Ministries and Departments of the Central Government, all statutory entities under the control of Central Government and all Central Public Sector Undertakings (CPSUs).*

2. Two Stage Process

The bidding process for PPP projects is divided into two stages. The First stage is generally referred to as Request for Qualification (RFQ) or Expression of Interest (EoI). The objective is to short-list eligible bidders for stage two of the process. In the second and final stage, generally referred to as the Request for Proposal (RFP) or invitation of financial bids, the bidders engage in a comprehensive scrutiny of the project before submitting their financial offers.

3. Request for Qualification (RFQ)

The RFQ process should aim at short-listing and pre-qualifying applicants who will be asked to submit financial bids in the RFP stage. The objective is to identify credible

bidders who have the requisite technical and financial capacity for undertaking the project. In order to encourage greater participation from credible domestic and international investors, the RFQ document should not require respondents to incur significant expense in preparing a response. The information sought for the purposes of pre-qualification should generally be restricted to technical and financial capabilities that are relevant to the project. Such information should be precise and quantified so that the process of short-listing is fair and transparent, and does not expose the government to disputes or controversy.

4. Number of bidders to be pre-qualified

4.1 The number of bidders to be pre-qualified and short-listed for the final stage of bidding i.e. the RFP stage needs careful consideration. On the one hand, the number should be adequate for ensuring real competition in bidding. On the other hand, a large number of short-listed bidders could dampen participation by serious bidders, thus diluting competition, because credible investors are normally less inclined to spend the time and money necessary for making a competitive PPP bid, if the zone of consideration is unduly large.

4.2 It is to be recognised that unlike a bid for procurement of goods and services, bids for PPP projects involve greater risks, significantly larger investments and long-term participation. Since PPP projects in infrastructure provide a critical service to the users at large, the quality and reliability of service assumes greater importance. Moreover, restricting the list to the best available bidders improves the chances of a successful PPP operation. For these reasons, about five pre-qualified bidders are favoured as an international best practice for securing high quality bids. In case short-listing is to be done for two or three projects at the same time, the number of short-listed bidders could be increased to 7 and 10 respectively. For this purpose, a fair and transparent system of evaluation at the RFQ stage would be necessary.

5. Specifying stringent pre-qualification criteria

While stringent eligibility criteria would ensure pre-qualification of bidders well suited for the RFP stage, it would also effectively reduce the number of qualified bidders. A balance, therefore, needs to be drawn for serving the objective of pre-qualifying a reasonable number of suitable bidders for the RFP stage. The principles for determining the eligibility criteria such as technical and financial capacity should be formulated keeping these considerations in view.

6. *Evaluation Criteria*

6.1 *The criteria for short-listing of bidders should be divided into technical and financial parameters as stated below:*

Technical Capacity

6.2 *The applicant should have acquired sufficient experience and capacity in building infrastructure projects. This can be measured either from the construction work undertaken/commissioned by him, or from revenues of BOT/BOLT/BOO projects, or from both, during the 5 years preceding the application date. Eligibility conditions, as necessary, may also be stipulated in respect of O&M experience.*

6.3 *The technical capacity of bidders can be assessed on the following parameters:*

- (a) **Project/construction Experience:** *Experience on eligible projects in the specified sector or other core sectors should be considered for determining the technical capacity of the applicant.*
- (b) **O&M Experience:** *The applicant should have experience of five years or more in operation and maintenance (O&M) of projects in the specified sector. In the absence of such experience, the applicant may be required to enter into an operations & maintenance (O&M) agreement with an entity having equivalent experience, failing which the concession agreement would be liable to termination. While suggesting this arrangement, it is proposed to provide sufficient flexibility for modifying these requirements to suit the needs of individual sectors/projects.*

Financial Capacity

6.4 *Applicants should have a minimum net worth equivalent to 25% of the estimated capital cost of the project for which bids are to be invited. In the case of projects with an estimated cost of Rs. 1,000 (one thousand) crore or more, the requirement of net worth could be suitably reduced, but should be no less than 15%. This would ensure that pre-qualified applicants have sufficient financial strength to undertake the project.*

7. *Eligibility of Experience*

The members of the consortium, who claim experience or networth in the RFQ must hold at least 26% of the consortium's equity. This condition is necessary for ensuring

that only the experience of those members who have a substantial stake is counted for the purposes of pre-qualification, and members with small equity holding are not added with the sole objective of improving the ranking in pre-qualification.

8. Technical evaluation at the RFP stage

8.1 *Requiring a technical evaluation at the RFP stage would normally lead to an elaborate and costly evaluation of complex proposals which are, by their very nature, difficult to compare since technical proposals of different bidders could vary significantly. Apart from the difficulties in evaluating diverse proposals on a common set of parameters, such evaluation also implies that instead of the government determining the assets and services to be provided by the selected bidder, it is the technical bid that would tend to guide the outcome. Logically, the government should set the technical parameters and ask for financial bids only, leaving sufficient flexibility for bidders to design and engineer the project in a manner that conforms to pre-determined standards and specifications, including service outputs.*

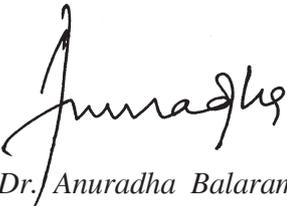

8.2 *In case of exceptionally complex projects where the project authority determines that the bidders must submit their technical proposals/ plans, the requirements thereof should be specified in detail and such proposals / plans should be invited at the qualification stage, either along with the initial applications or at an intermediate stage preceding the bid stage. Only pre-qualified applicants should be invited to participate in the bid stage, which shall only consist of an invitation to submit financial offers.*

9. Model RFQ Document

9.1 *A model RFQ document has been developed based on the principles outline above. The model document is generic in nature and aims at lending transparency and predictability to the entire process, allowing decisions to be made expeditiously. It also provides the requisite sector-specific and project-specific flexibility by placing several provisions within square brackets, thus enabling project authorities to make necessary substitutions. To the extent possible, the concerned Ministries should standardise the provisions contained in square brackets so that case by case modifications are minimised. Some flexibility has also been afforded through explanations in the footnotes and project-specific/ sector-specific modifications may be undertaken to the extent enabled by the footnotes. In case any further flexibility*

is needed for a specific sector or project, the required modifications may be made with prior approval of the PPP Appraisal Committee.

- 9.2 *The model RFQ document addresses the critical requirements that should be observed for conducting a fair and transparent process of pre-qualification. The administrative ministries/autonomous bodies intending to procure infrastructure projects through PPP should observe these guidelines for short-listing of bidders for the Request for Proposal (RFP)/Financial Bid stage.*
10. *These instructions shall come into force with immediate effect and will apply to all cases where bids are invited after April 18, 2007.*

1. INTRODUCTION

1.1 Background

1.1.1 The [National Highway Authority of India]¹ (the “Authority”) is engaged in the development of [highways] and as part of this endeavour, the Authority has decided to undertake development of [2 highways] Project[s] (the “Project”) through private² participation on [Build, Operate and Transfer (the “BOT”)] basis, and has decided to carry out the bidding process for selection of the preferred bidder/sponsor. The project[s] [are] as follows:

S. No.	Name of the [Highway]	[Length in Km]	Indicative Project Cost ³ (In Rs. cr.)
1			
2			

[(collectively the “Projects” and singly the “Project”).]

The Authority intends to pre-qualify suitable Applicants who will be eligible for participation in the Bid Stage, for awarding the Project[s] through an open competitive bidding process in accordance with the procedure set out herein.

1.1.2 The successful Bidder, who is either a company incorporated under the Companies Act, 1956 or undertakes to incorporate itself as such prior to execution of the concession agreement (the “Concessionaire”), shall be responsible for [designing, engineering], financing, procurement, construction, operation and maintenance of these Project[s] under and in accordance with the Concession Agreement to be entered into between the Concessionaire and the Authority.

1.1.3 The scope of work may broadly include [rehabilitation, upgradation and widening of the existing carriageway to four-lane standards with construction of new pavement,

¹ All provisions within parenthesis may be suitably modified based on project-specific requirements.

² If public sector companies are to be allowed to bid, this Clause may be modified accordingly.

³ If the project agreements do not provide for any obligations or liabilities that arise from or are related to capital costs of the project, this column may be omitted.

rehabilitation of existing pavement, construction of major and minor bridges, culverts, road intersections, interchanges, drains, etc.]

- 1.1.4 Indicative capital costs of [each/the] Project (the “Estimated Project Cost”) will be revised and specified in the [respective] Bidding Documents of [each/the] Project. The assessment of actual costs, however, will have to be made by the Bidders.

1.2 Brief description of Bidding Process

- 1.2.1 The Authority intends to follow a two-stage process (collectively referred to as the “Bidding Process”) for selection of the preferred bidder[s] for the Project[s]. The first stage (the “Qualification Stage”) of the process involves qualification (the “Qualification”) of interested parties/consortia (the “Applicants”). At the end of this stage, the Authority expects to announce a short-list of suitable pre-qualified Applicants who shall be eligible for participation in the second stage of the Bidding Process (the “Bid Stage”) comprising Request for Bids/Proposals (the “Request for Bids/Proposals” or “RFP”).

[GOI has issued guidelines (see Appendix-4) for disqualification of bidders seeking to acquire stakes in any public sector enterprise through the process of disinvestment. These guidelines shall apply *mutatis mutandis* to this Bidding Process. The Authority shall be entitled to disqualify an Applicant in accordance with the aforesaid guidelines at any stage of the Bidding Process. Applicants must satisfy themselves that they are qualified to bid, and should give an undertaking to this effect in the form at Appendix-1.]

- 1.2.2 During the Qualification Stage, Applicants would be required to furnish the information specified in this RFQ. Only those companies or consortia that are pre-qualified by the Authority shall be invited to submit their Bids for the Project[s]. The Authority is likely to provide a comparatively short time span for submission of the Bids for the Project[s]. The Applicants are, therefore, advised to visit the site(s) and familiarise themselves with the Project[s].

[An Applicant shall be entitled to apply for pre-qualification to undertake either one or more Projects.]

- 1.2.3 In the Bid Stage, the short-listed pre-qualified Applicants (the “Bidders”) will be called upon to submit their financial offers (the “Bids”) in respect of [any or all the Project(s)], in accordance with the bidding documents comprising the Request for Bids/ Proposals (the “Bidding Documents”), [which shall be separate for each Project].

The Bidding Documents for [each/the] Project will be provided to every Bidder on payment of [Rs. 10,000 (Rs. ten thousand only)]. The Bid shall be valid for a period of not less than 120 days from the Bid Due Date.

- 1.2.4 A Bidder will be required to deposit, alongwith its Bid, a bid security equivalent to 1% (one per cent)⁴ of the Estimated Project Cost (the “Bid Security”), refundable not later than 30 days from the last date for submission of Bids (the “Bid Due Date”) except in the case of the two [lowest/ highest] Bidders. The Bidders will have an option to provide Bid Security in the form of a bank guarantee acceptable to the Authority⁵ and in such event, the validity period of the bank guarantee shall be not less than [150 days] from the Bid Due Date, as may be extended by the Applicant from time to time. The Bid shall be summarily rejected if it is not accompanied by the Bid Security.
- 1.2.5 Generally, the successful Bidder shall be the [lowest/highest] Bidder. The second [lowest/highest] Bidder shall be kept in reserve and may be invited to match the Bid submitted by the [lowest/highest] Bidder in case such [lowest/highest] Bidder withdraws or is not selected for any reason. Category 4: Construction experience on Eligible Projects in core sector that qualify under Clause 3.2.4

For the purpose of this RFQ:

- (i) [highways sector would be deemed to include highways, expressways, bridges, tunnels and airfields;] and
- (ii) core sector would be deemed to include power, telecom, ports, airports, railways, industrial parks, petroleum and natural gas, pipelines, irrigation, water supply, sewerage and real estate development.¹⁵

¹⁵ In case the RFQ is not for a highway project, include highways in sub-clause (ii) and exclude the sector which has been included in sub-clause (i).

- 3.2.2 Eligible Experience in respect of each category shall be measured only for Eligible Projects.
- 3.2.3 For a project to qualify as an Eligible Project under Categories 1 and 2:
- (a) It should have been implemented on BOT, BOLT, BOO, BOOT or other similar basis;
 - (b) the entity claiming experience should have held, in the company owing the Eligible Project, a minimum of 26% equity during the period for which Eligible Experience is being claimed;
 - (c) the capital cost of the project should be more than [Rs. 50 (fifty) crore]¹⁶; and
 - (d) the entity claiming experience shall, during the past 5 (five) financial years preceding the Application Due Date, have (i) commissioned the construction work of the project and paid for it, and/ or (ii) collected and appropriated the revenues of such project after commencement of commercial operation.
- 3.2.4 For a project to qualify as an Eligible Project under Categories 3 and 4, the Applicant should have received payments from its client(s) during the 5 (five) financial years immediately preceding the Application Due Date for works executed, fully or partially, and only the payments (gross) actually received during such 5 (five) financial years shall qualify for purposes of computing the Experience Score. However, payments received in respect of projects having a capital cost of less than [Rs. 50 (fifty) crore]¹⁷ shall not be reckoned as payments for Eligible Projects.
- 3.2.5 The Applicant shall quote experience in respect of a particular Eligible Project under any one category only, even though the Applicant (either individually or alongwith a member of the Consortium) may have played multiple roles in the cited project. Double counting for a particular Eligible Project shall not be permitted in any form.
- 3.2.6 Applicant's experience shall be measured and stated in terms of a score (the "Experience Score"). The Experience Score for a given category would be the project costs or certified payments/ receipts, as the case may be, divided by one crore and then multiplied by the applicable factor in Table 3.2.6 below. In case the Applicant has experience across different categories, the score for each category would be computed as above and then aggregated to arrive at his Experience Score.

¹⁶ This amount should not be less than 10% of the amount specified in Clause 2.2.2 (A). In case of Projects with an Estimated Project Cost of Rs. 1,000 cr. or above, this amount may be suitably reduced but not less than 5% in any case.

¹⁷ This amount should be determined as per footnote 16 above.

Table 3.2.6: Factors for Experience across categories¹⁸

Category	Factor
Category 1	1.25
Category 2	1.00
Category 3	0.75
Category 4	0.50

3.2.7 Experience for any activity relating to an Eligible Project shall not be claimed by two or more members of the Consortium. In other words, no double counting by a Consortium in respect of the same experience shall be permitted in any manner whatsoever.

3.3 Details of Experience

3.3.1 The Applicant should furnish the details of Eligible Experience for the past 5 (five) years preceding the Application Due date.

3.3.2 The Applicants must provide the necessary information relating to Technical Capacity as per format at Annex-II of Appendix-1.

3.3.3 The Applicant should furnish the required information and evidence in support its claim of Technical Capacity, as per format at Annex-IV of Appendix-1.

3.4 Financial information for purposes of evaluation

3.4.1 The Application must be accompanied by the Audited Annual Reports of the Applicant (of each member in case of a Consortium) for the last 5 (five) financial years, preceding the year in which the Application is made.

3.4.2 In case the annual accounts for the latest financial year are not audited and therefore the Applicant could not make it available, the Applicant shall give an undertaking to the same effect and the statutory auditor shall certify the same. In such a case, the Applicant shall provide the Audited Annual Reports for four years preceding the year for which the Audited Annual Report is not being provided.

¹⁸ These factors may be modified by the Authority by upto one-third thereof in each category.

3.5 Short-listing of Applicants

- 3.5.1 The credentials of eligible Applicants shall be measured in terms of their Experience Score. The sum total of the Experience Scores for all Eligible Projects shall be the ‘Aggregate Experience Score’ of a particular Applicant. In case of a Consortium, the Aggregate Experience Score of each of its members, who have an equity share of at least 26% in such Consortium, shall be summed up for arriving at the combined Aggregate Experience Score of the Consortium.
- 3.5.2 The Applicants shall then be ranked on the basis of their respective Aggregate Experience Scores and short-listed for submission of Bids. The Authority expects to short-list upto [5 (five)]¹⁹ pre-qualified Applicants for participation in the Bid Stage. The Authority, however, reserves the right to extend the number of short-listed pre-qualified Applicants (“Bidders”) upto [6 (six)].

¹⁹ For each Project, the number of short-listed bidders should not normally exceed 5 (five). In case shortlisting is to be done for two or three Projects at the same time, the short-listed bidders could be increased to 7 and 10 respectively. In case of power projects to be awarded on the basis of statutory guidelines for tariff-based bidding and having no obligations or liabilities for buy-out of project assets or any similar obligations, the Authority may suitably increase the number of short-listed bidders.

4. FRAUD AND CORRUPT PRACTICES

- 4.1 The Applicants and their respective officers, employees, agents and advisers shall observe the highest standard of ethics during the Bidding Process. GUIDELINES OF THE DEPARTMENT OF DISINVESTMENT²⁶

No. 6/4/2001-DD-II
Government of India
Department of Disinvestment

Block 14, CGO Complex
New Delhi.
Dated 13th July, 2001.

OFFICE MEMORANDUM

Sub: Guidelines for qualification of Bidders seeking to acquire stakes in Public Sector Enterprises through the process of disinvestment

Government has examined the issue of framing comprehensive and transparent guidelines defining the criteria for bidders interested in PSE-disinvestment so that the parties selected through competitive bidding could inspire public confidence. Earlier, criteria like net worth, experience etc. used to be prescribed. Based on experience and in consultation with concerned departments, Government has decided to prescribe the following additional criteria for the qualification/ disqualification of the parties seeking to acquire stakes in public sector enterprises through disinvestment:

- (a) In regard to matters other than the security and integrity of the country, any conviction by a Court of Law or indictment/adverse order by a regulatory authority that casts a doubt on the ability of the bidder to manage the public sector unit when it is disinvested, or which relates to a grave offence would constitute disqualification. Grave offence is defined to be of such a nature that it outrages the moral sense of the community. The decision in regard to the nature of the offence would be taken on case to case basis after considering the facts of the case and relevant legal principles, by the Government of India.
- (b) In regard to matters relating to the security and integrity of the country, any charge-sheet by an agency of the Government/conviction by a Court of Law for an offence committed by the bidding party or by any sister concern of the bidding party would result in disqualification. The decision in regard to the relationship between the sister concerns would be taken, based on the relevant facts and after examining whether the two concerns are substantially controlled by the same person/persons.

²⁶ These guidelines may be modified or substituted by the Government from time to time.

- (c) In both (a) and (b), disqualification shall continue for a period that Government deems appropriate.
- (d) Any entity, which is disqualified from participating in the disinvestment process, would not be allowed to remain associated with it or get associated merely because it has preferred an appeal against the order based on which it has been disqualified. The mere pendency of appeal will have no effect on the disqualification.
- (e) The disqualification criteria would come into effect immediately and would apply to all bidders for various disinvestment transactions, which have not been completed as yet.
- (f) Before disqualifying a concern, a Show Cause Notice why it should not be disqualified would be issued to it and it would be given an opportunity to explain its position.
- (g) Henceforth, these criteria will be prescribed in the advertisements seeking Expression of Interest (EOI) from the interested parties. The interested parties would be required to provide the information on the above criteria, along with their Expressions of Interest (EOI). The bidders shall be required to provide with their EOI an undertaking to the effect that no investigation by a regulatory authority is pending against them. In case any investigation is pending against the concern or its sister concern or against its CEO or any of its Directors/ Managers/ employees, full details of such investigation including the name of the investigating agency, the charge/ offence for which the investigation has been launched, name and designation of persons against whom the investigation has been launched and other relevant information should be disclosed, to the satisfaction of the Government. For other criteria also, a similar undertaking shall be obtained along with EOI.
